Understanding Your Report

Congratulations, on taking the first step towards career planning. By undergoing our Career Assessment test you have started your career journey on the right foot. We will start by trying to understand what each of the sections in this report mean.

Aptitude Test Results

This section tests a student's natural ability or talent to perform certain kinds of things. No prior knowledge is generally required to attend the test. The scores in this section will show what you are naturally good at.

Curriculum Based Test Results

This section tests your current knowledge level on subjects being taught at school. The results of this section will show your understanding of various subjects. Having knowledge of basic concepts taught at school is important for further career advancement. This section enables you to understand the areas that you excel at and the areas that you need to work on to pursue a specific career.

Interest Test Results

This test shows your interest in various career options. This will help you to find areas that you have a strong interest in and therefore more likely to enjoy work.

Personality Test Results

Personality is the combination of behaviour, emotion, motivation and thought patterns that define an individual. Your personality is just beginning to form and take shape at this stage and will most likely change with your life experiences. This personality test will give an introduction to exploring yourself. Note: In case the student has not marked enough options, the personality test results will show as 'invalid'.

Vocational Recommendation

People working in professions that they are naturally good at and interested in are more likely to succeed than people who pick professions that do not match their talent and interest. At the end of this report, you will see 2 or 3 recommended career options based on analysis of your aptitude, subject knowledge and interest test results. These are the best suited career options that you are most likely to enjoy and excel in.

Aptitude Tests and Aptitude Scores

About Aptitude Test

Aptitudes are natural talents, special abilities for doing, or learning to do, certain kinds of things. Manual dexterity, musical ability, spatial visualization, and memory for numbers are examples of such aptitudes.

Personality

Personality

Personality is the combination of behavior, emotion, motivation, and thought patterns that define an individual. Personality psychology attempts to study similarities and differences in these patterns among different people and groups. There are many definitions and theories of personality which are based on different and varied aspects of the human beings. Some are based on emotions, the physique, body fluids, or aspects of human nature such as, assertiveness, introversion, extroversion, sociability, adaptability and so on. This personality inventory is based on one such classification and is just an indicator. It should be borne that this just to quip the student's interest. The personality of the student is just beginning to form and take shape. As life experiences occur more of his personality traits get expressed or exhibited. This personality inventory gives a little introduction to the self- "self discovery"- and could be a lead to discover oneself through one's own exploration.

**Kiran
you are**

The Defenders

You put others' needs before your own. You are quiet, obedient, tidy, dutiful, caring and gentle. You prefer hands-on

experience to ideas and concepts. You like clear instructions and defined procedures. You gather facts, examine and then decide what is good for everyone. You value people as well as work.
